empowering women & ethically made

YJ APPAREL

a clothing, crafts and accessories made for every season of life

YJ Apparel specializes in ladies clothing and handmade products made by a Women's Cooperative. We work with a group of women craftspeople with different skills in northern part of Thailand. Our team worked together for a foreign clothing brand for over 15 years, then we decided to start our own business in 2018. We are proud to empower our women artisans to earn an income in a fair wage so that they can support themselves and their families.

YJ Apparel offers a variety of high-quality, unique, and comfortable casual apparel and accessories that can be worn every day. Our designs are timeless inspired by love, nature, positive thoughts, and happiness of makers. Our products are well made in high quality with long-lasting materials that can be used for years.

We commit to sustainable production, minimizing waste and focusing on minimal environmental footprint by carefully select materials locally; with the use of eco-friendly and natural materials, as well as upcycled materials from pre- and post-consumption waste.

We provide a variety of products and services; material sourcing, design, pattern making, sampling, and more. Our production includes ladies casual wears, knitwear, handknit, handloom, crochet, hand embroidery, garment dye, textile accessories, and crafts.

We can do either CMT, OEM/FOB or ODM products; both a large quantity garment production for brands and a small quantity production for sampling.

With experience in a high-end clothing production field for a decade, we assure that our products would be shipped on time in a high-quality.

Double Gauze Cotton Collection

Made in soft 100% cotton double gauze fabric, a wonderful long-lasting material, pre-washed and pre-shrunk.

Natural Dye

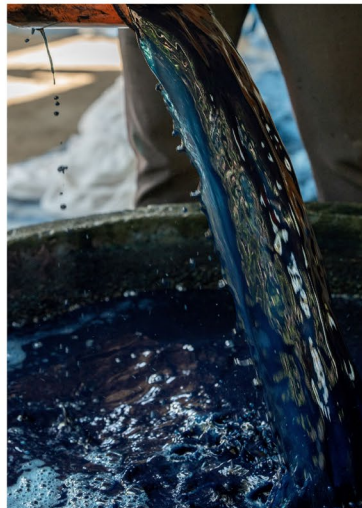

A sustainable, unique and durable outfit with eco-friendly and natural materials

Dyeing with a low carbon impact.

Our yarn in this collection is natural dyed yarn. It's hand dyed with non-chemical throughout the process using bark from plants which grown naturally to create dyes.

The bark can be reused several times in the process. The remaining waste material and liquid dye are safely put on the garden, on the compost or disposed of in household waste without any concerns re pollution

Our Cotton yarn is certified OEKO-TEX®
